NEW OWNERSHIP TEAM TAKES SOUTH SHORE CONTROLS TO THE NEXT LEVEL

Team of investors seeks to expand operations, starting with new state-of-the-art facility

Mentor, OH – South Shore Controls, Inc. is under new ownership, which looks forward to taking it to the next level, beginning with building a new state-of-the-art facility in Mentor.

The new ownership consists of an investor group led by John Ovsek and Chris Langmack. The team brings more than 43 years of Tier 1 manufacturing and machine tool sales expertise, which it will utilize to help grow the company.

“South Shore Controls was founded by two brilliant men who did an impressive job of growing the company using only word of mouth,” Ovsek said. “Our team is eager to use its manufacturing experience to implement processes and procedures to build on what the company’s founders have achieved through strategic, steady expansion, starting with our new facility.”

Realizing South Shore Controls’ existing facility in Perry, Ohio could not accommodate expansion, its new ownership decided to build a state-of-the-art facility in Mentor at 9395 Pinecone Dr. The building will offer 35,000 square feet of additional manufacturing and office space for up to 50 employees, and allow doubling the space for continued expansion. The new facility will enable South Shore Controls to increase its manufacturing capacity as well as welcome additional highly-skilled electrical, mechanical and chemical engineers to its team. The new facility is expected to be completed by late summer 2019.

Ovsek said he and his team are also looking to expand the product line breadth of Niagara Systems, a designer and manufacturer of industrial washing systems and a South Shore Controls company, to add value to its global client base. Though South Shore Controls has traditionally served clients in Northeast Ohio, it has performed work across the country and globe and plans to expand its national and global reach in the likeness of Niagara Systems.

About South Shore Controls

South Shore Controls, Inc., founded in 1996, is an expert factory automation company that designs, engineers, manufactures, installs, and making process improvements for plant operations across a complete spectrum of controls, electrical, and mechanical designs. The company specializes in custom-designed solutions for automation, converting lines, and web handling.

Located in Mentor, OH, South Shore Controls' 35,000-square-foot engineering and manufacturing space offers a full range of electrical, mechanical, and machining services for the industry. South Shore has the capacity to be a single-source vendor for complete converting lines, pick and place automated systems, and simple line control upgrades.

South Shore Controls also provides maintenance and repair services for many industrial factory systems. By utilizing a staff of highly skilled technicians and a fleet of 24/7 service vehicles, South Shore helps local companies maximize plant uptime with on-site repair and installation services.
