AUTOMATION AND CONTROLS SPECIALISTS

AUTOMATION AND CONTROLS

YOUR SINGLE SOURCE AUTOMATION EXPERTS

southshorecontrols.com

ABOUT US

South Shore Controls, founded in 1996, offers a depth of talent across the complete spectrum of controls, electrical and mechanical design. We have vertically integrated in-house manufacturing capabilities from project collaboration and initial designs to finished turnkey systems.

We are factory automation experts in designing, engineering, manufacturing, installing and process improvements for plant operations, no matter what the platform. Our industrial automation offerings include electrical, mechanical and machining services. Custom-designed solutions are our specialty. Our consultants can help you develop a highly-optimized automation strategy for your manufacturing or processing operations, while keeping safety and regulatory compliance issues in mind.

We have a complete modern 35,000-square-foot engineering and manufacturing space in Mentor, Ohio. The facility gives South Shore the capacity to single source a complete converting line, pick and place automated systems and still have flexibility to handle simpler line control upgrades.

Our engineers integrate control systems from all the major industrial automation control platforms including Rockwell, GE, Mitsubishi, Parker, ABB, Siemens and more. Our software experience includes programming and development of factory automation systems with all of the major software platforms, including Wonderware, RSView, and CIMplicity. Documentation packages include AutoCAD and Solidworks.

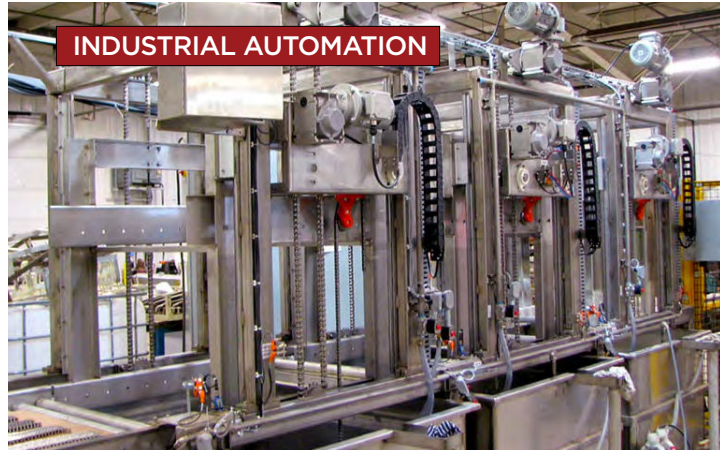

For added value, South Shore Controls also provides maintenance and repair services for the majority of factory systems to maximize your plant's uptime. We have a fleet of field installation service vehicles for 24/7 on-site repair and installation.

We are proud that our integrity, superior capabilities and experience have allowed us to retain many of our original customers. We are the factory automation experts.

INDUSTRIAL AUTOMATION & SYSTEMS INTEGRATION

SOUTH SHORE CONTROLS DESIGNS, MANUFACTURES, AND INSTALLS FACTORY AUTOMATION SOLUTIONS

Electrical and mechanical design engineering is at the core of everything we do. We offer process improvements for plant operations across a complete spectrum of controls, electrical, and mechanical systems.

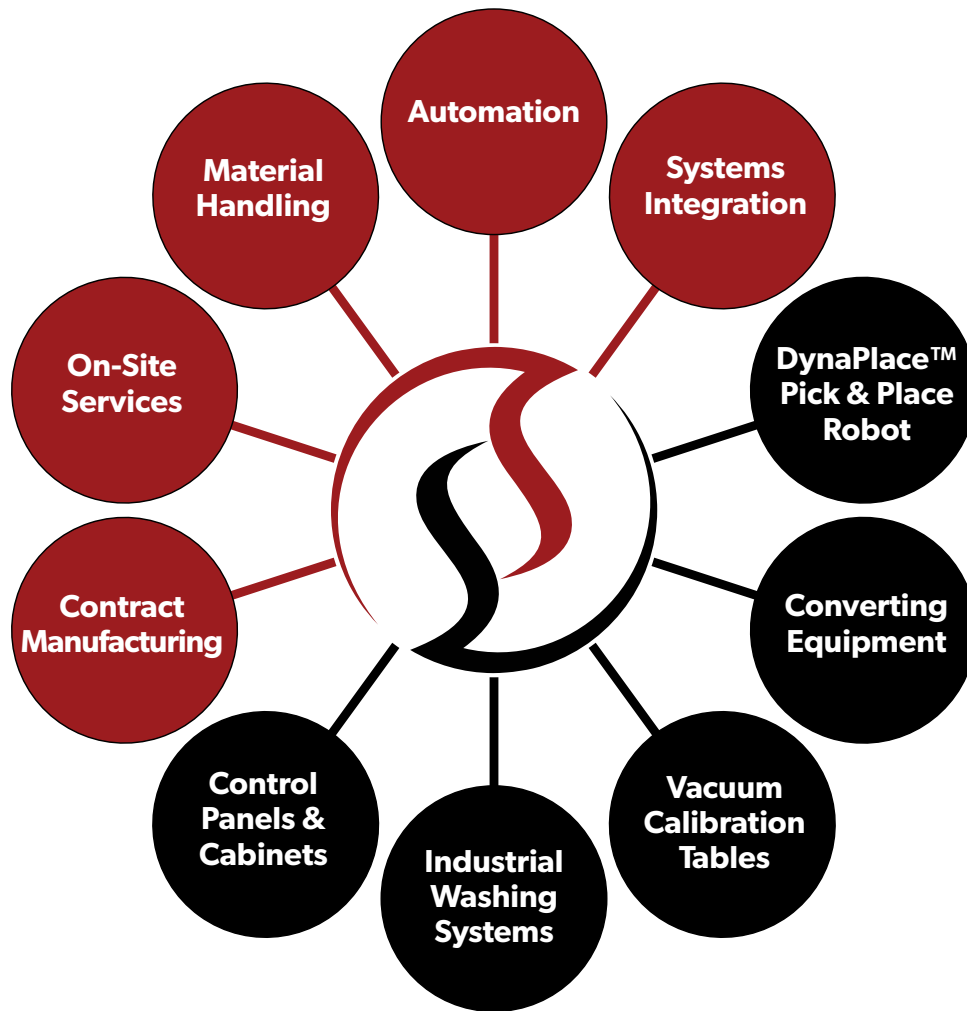

Engineering and manufacturing for standard and custom factory automation products including:

Typical Projects

- Robotic/Pick and Place Cells
- Parts Feeding and Orientating Systems
- Palletizing, Stacking, Packing
- Tray Handling Systems
- Chemical Batching Systems
- Washing and Drying Systems
- Vision Inspection Systems
- Assembly and Inspection

Areas of Expertise:

- AC and DC Drives & Motion Batch Process Controls
- Control Panels
- Control System Retrofits
- Control Upgrades
- Conveying/Material Handling
- Drive Systems
- HMI Programming
- Pick and Place Robotic Systems
- PLC Programming
- Position and Presence Monitoring
- Specialized Machinery
- Temperature Sensing and Control Systems

We have decades of experience developing hardware and software systems for a wide range of industries. Whether you are adding a new line or upgrading an existing line, we can quickly analyze your equipment and provide a comprehensive analysis and recommendation for improved operating efficiencies.

We design it, build it, install it and maintain it for maximum operating efficiency.

SOUTH SHORE CONTROLS INDUSTRY FOCUS

Aerospace | Military & Defense
Automotive | Machinery
Converting | Paint & Coatings
Food & Beverage
Infrastructure | Utilities
Minerals | Metals | Mining
Oil & Gas, Energy & Power
Pharmaceuticals | Chemicals
